## Garden Roof

GAMMON HIP HING JV | TAMAR DEVELOPMENT

### Project

The impressive Central Government Complex Tamar is the new location of the offices of the Government of Hong Kong Special Administrative Region. The 42,000m<sup>2</sup> plot is among the most prestigious and most expensive ones in Hong Kong. The project uses neither Chinese nor European government building design, but instead it is a mix of postmodern architecture and low-frills international design. The building's multi-storey underground carpark and facility quarters reaching deep into groundwater, thus required reliable waterproofing.

### Solution

**Kesford** had completed over 100,000s.m. waterproofing works for all podiums, flat roofs, water tanks, lift pit, external wall and internal wet areas. And our spray applied polyurea membrane was also applied onto the garden roof of link bridge surface.

## CONVERSION OF YAU MA TEI THEATRE AND RED BRICK BUILDING

### CONVERSION OF YAU MA TEI THEATRE AND RED BRICK BUILDING
